**SUPER  
LANDER**

SUPER LANDER

VIC-1907

Land your spaceship safely on the only solid landing site on Jupiter. Make as many exploratory landings as possible before fuel runs out. There are only 3 landing sites with 3 exciting difficulty levels. You can control the thrust level of play.

A - Left thrust | D - Right thrust  
F1 - Heavy thrust | F2 - Middle thrust  
F3 - Low thrust

The softness of the landing site is displayed on the meters-per-second gauge on the right side of the screen. If you land below the yellow zone - you crash. The softer the landing area... the more points you get. Try to land with the marker high in the yellow zone.

**Released:** 1981, (also known as Jupiter Lander)  
**Modus:** Dual player  
**Genre:** Action, reaction
